

Table of Contents

Section I - Introduction and Background

Introduction and Background	1-1
Study Partners and Acknowledgements	1-1
Study Context	1-3
Study Purpose	1-3
Study Goals	1-3
<i>Public and Community Involvement</i>	<i>1-3</i>
<i>Regional Coordination in Land Use and Transportation Planning</i>	<i>1-4</i>
<i>Community Vitality, Livability and Sustainability</i>	<i>1-4</i>
<i>Serving Regional Transportation Needs</i>	<i>1-4</i>
<i>Funding and Implementation.....</i>	<i>1-4</i>
Study Process	1-5

Section 2 - Public Involvement and Community Outreach

Focus on Community	2-1
Community Dialogue Workshops	2-1
<i>Overview</i>	<i>2-1</i>
<i>Identifying Stakeholders.....</i>	<i>2-2</i>
<i>Notifying Stakeholders.....</i>	<i>2-2</i>
<i>Notifying the Public.....</i>	<i>2-2</i>
<i>Outreach Methods</i>	<i>2-3</i>

Corridor Visioning Exercise..... 2-4
 Common Themes2-5

Next Generation Perspectives 2-7

Additional Comments During Study Development..... 2-9
 General Corridor/Regional Comments.....2-9
 Bainbridge Island2-12
 Suquamish Area2-13
 Poulsbo Area2-14

Joint Meeting of Councils, April 2007 2-15

Comments on the Draft Vision 2-17

Comments on the Final Draft Vision 2-18

Section 3 - Existing and Projected Conditions

Introduction..... 3-1

Existing and Projected Overall Corridor Conditions 3-1
 Bainbridge Island3-1
 Suquamish/Port Madison Indian Reservation3-2
 Poulsbo3-3
 Scenic Qualities of the Corridor.....3-4
 Population and Growth.....3-4
 Regional Growth Influences.....3-5
 Existing Bicycle and Pedestrian Conditions.....3-6
 Existing Plans and Policies3-14

SR 305 Corridor Travel Demand Projections	3-15
<i>Overview</i>	<i>3-15</i>
<i>Demand Analysis.....</i>	<i>3-16</i>
Existing and Projected Roadway and Traffic Conditions	3-19
<i>Existing Right-of-Way and Topographic Conditions.....</i>	<i>3-19</i>
<i>Existing Roadway Conditions</i>	<i>3-20</i>
<i>Existing Traffic Conditions.....</i>	<i>3-21</i>
<i>Projected 2030 Traffic Conditions.....</i>	<i>3-22</i>
<i>Near Term and Planned Roadway Improvements</i>	<i>3-22</i>
Existing and Project Transit Conditions.....	3-23
<i>Overview of Existing Transit Service.....</i>	<i>3-23</i>
<i>Transit Stops and Pedestrian and Bicycle Facilities</i>	<i>3-23</i>
<i>Existing Transit Service</i>	<i>3-26</i>
<i>Other Transit Facilities.....</i>	<i>3-26</i>
<i>Identified Transit Improvements.....</i>	<i>3-26</i>
<i>Passenger Only Ferry Investment Plan.....</i>	<i>3-27</i>
<i>Park & Ride Facilities.....</i>	<i>3-27</i>
Section 4 - Preliminary Technology Review	
Screening Process Overview.....	4-1
Initial Screening.....	4-1
High Capacity Transit Characteristics.....	4-2
<i>Limited Stops & Enhanced Stations and Shelters</i>	<i>4-2</i>

Fast Boarding and Alighting 4-2

Off-board Payment..... 4-2

Intelligent Transportation Systems 4-3

Modes Considered in Initial Screening 4-3

Definition of Transit Modes..... 4-3

Results of Initial Screening 4-6

*Modes Eliminated from Further Consideration -
 First Screening Results*..... 4-6

Modes Selected for Further Evaluation 4-6

Section 5 - Description of Alternatives Chosen for Further Study

Overview 5-1

Choosing the Most Suitable Technology 5-1

Identifying Operational Goals..... 5-2

Alignment Description 5-2

Potential Major Capital Projects 5-3

Crossing SR 3..... 5-3

Crossing Agate Passage..... 5-4

New Stations and Park & Ride Facilities..... 5-4

Preliminary Options Evaluation 5-4

No Action Option 5-4

Fixed Guideway Option..... 5-11

<i>Bus Rapid Transit Option (Includes Various Sub-Options)</i>	5-19
Evaluation Criteria	5-26
<i>Transit System Operations</i>	5-26
<i>Station Siting</i>	5-26
<i>Ferry Terminal Integration</i>	5-26
<i>Safety, Reliability and Comfort</i>	5-27
<i>Estimated Costs</i>	5-27
<i>Environmental & Aesthetic Impacts</i>	5-27
<i>Community Goals</i>	5-27
<i>Roadway Operational Impacts</i>	5-27
Evaluation Measures and Results	5-28

Section 6 - Interim Recommended Direction

Overview	6-1
Interim Roadway and Transit Priority Treatments	6-2
Transit Stops and Stations	6-9
<i>Station Access and Local Circulation</i>	6-11
<i>Park & Ride Recommendations</i>	6-13
Land Use and Transit Oriented Development	
Recommendations	6-14
Implementing the Bicycle and Pedestrian Network	6-18
Transportation Demand Management	6-19
Access Management Recommendations	6-19

Background – Traditional Access Management6-19

Access Management in the SR 305 Corridor.....6-20

Access Management Implementation Challenges6-21

Cost Estimates for Interim HCT Improvements..... 6-21

HCT Operating Plan..... 6-22

Operational Recommendations6-22

Phasing6-26

Vehicles.....6-26

Section 7 - Long Term Vision

Overview 7-1

Long Term HCT Vision..... 7-1

Fixed Guideway Transit Conceptual Operating Concept 7-4

Stations and Park & Ride Strategy.....7-5

HCT Transit Demand.....7-6

Section 8 - Next Steps

Overview 8-1

Updated Data Collection and Detailed Technical Analysis..... 8-1

Ongoing Study Roles and Responsibilities..... 8-2

Ongoing Public Involvement..... 8-3

Ongoing Coordination with FTA and the Next Phase of Study.....	8-3
FTA-Compliant Alternatives Analysis and Selection of the Locally Preferred Alternative.....	8-3
New Starts or Small Starts Project Development.....	8-4
Preliminary Engineering/Detailed NEPA Environmental Analysis.....	8-5
<i>Process Diagram</i>	8-6

Appendices

Appendix A - SR 305 Corridor Existing Conditions - Technical Memorandum

Appendix B - SR 305 Corridor 2030 Forecasted Baseline Conditions - Technical Memorandum

Appendix C - Reversible Center Transit Lane Analysis - Technical Memorandum

Appendix D - Existing Conditions/Topographic Maps

Appendix E - Public Involvement Plan

Appendix F - Community Dialogue Summary Report

Appendix G - Study Information Sheets and Newsletters
